

Assets

Assets are reusable content in Omni CMS that provide a single source of content for use on multiple pages. When the asset is edited and published, the content automatically updates on each page the asset was placed on. The different types of assets also allow for some more complicated types of content than you can create in the page editor. You cannot edit an asset on a page, but must open the original asset to make and save any changes.

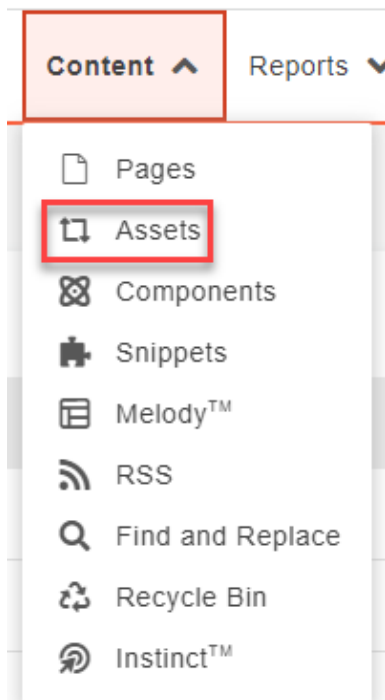

Image Gallery

Creating an image gallery asset is a three-step process. First, create the asset, where you fill out basic information. Then, upload the images into the asset, sort, and caption them before saving and publishing.

Create New Image Gallery Asset

1. Click **Content** -> **Assets**

2. Click the Dropdown **NEW** -> **Image Gallery**

3. Enter:

- **Name**
- **Description** (optional)
- **Tags** (optional)

Name

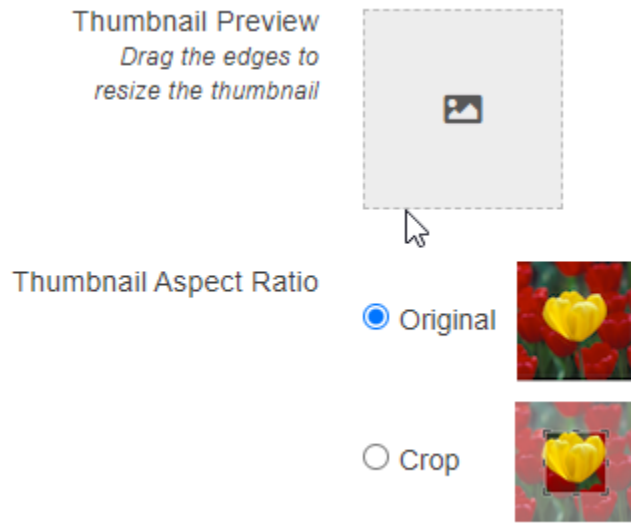

Description

Tags

- **Access Group** (Select the group that can edit this asset, optional)
- **Gallery Options:**
 - **Maximum Thumbnail Size:** Type the maximum width and height of the thumbnails. The max value for each is 500 pixels.

Maximum Thumbnail Size **W** x **H**

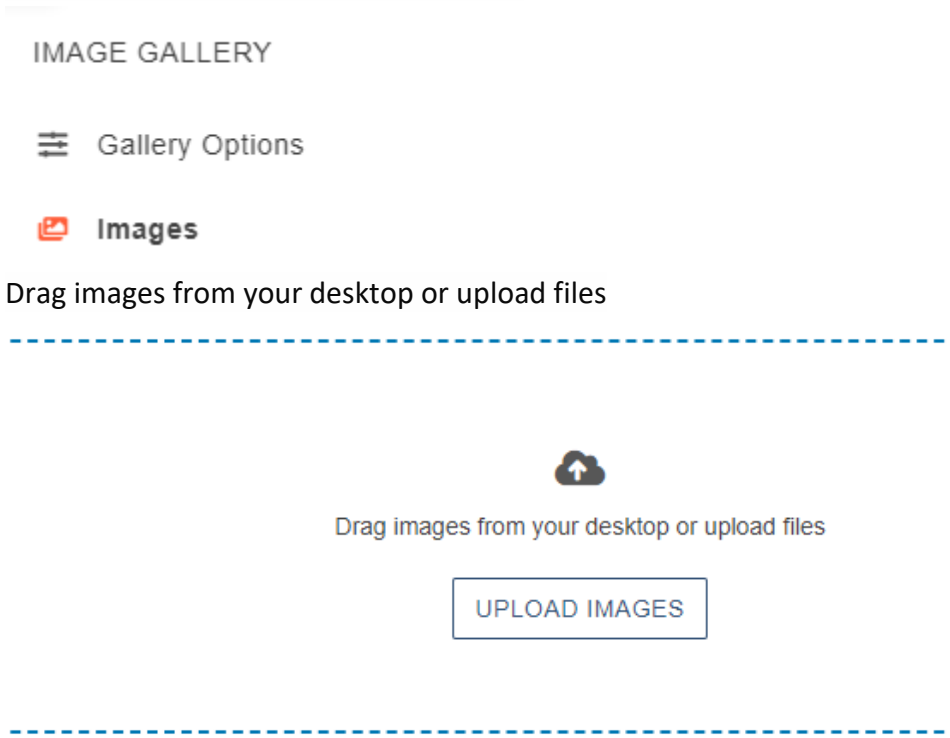

- **Thumbnail Preview:** Drag the dotted-line of the preview box to adjust, if desired.

2. Click **Create**
3. Click **Edit** to upload images

4. Click **Images** on the left side of the page

6. Enter:

			
Title Front of CHC/ATC Building	Title Back of CHC/ATC Building	Title Health Sciences Building	Title Student Union Building
Description Image of front of CHC/ATC building	Description Image of Back of CHC/ATC building	Description Health Sciences building	Description Student Union building
Caption	Caption	Caption	Caption
Link	Link	Link	Link

- **Title**
- **Description**
- **Caption (optional)**
- **Link (optional)**

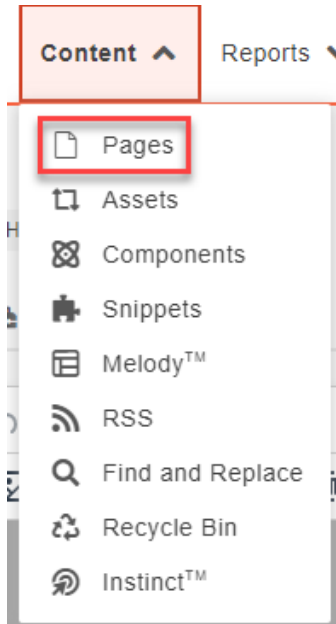

7. Save **Image Gallery**

8. Submit **Image Gallery**

Your asset is now available for use on pages, but must be published before it appears on any live web pages.

Add Image Gallery to Webpage

1. Click **Content** -> **Pages** and find the page to add the **Image Gallery** or go to the page to add the **Image Gallery** and login

2. Click **Edit**

3. Click one of the green edit buttons

4. Click the **Component** icon

5. Click **Gallery with Options**

6. Enter the **Image Gallery** you created
7. Select the **Gallery Output Type**
