Program Notes

1. Humanities Areas I, II & III - see catalog for course options
2. Biological Science - see catalog for course options
3. Social Sciences Areas I, II, & III – see catalog for course options
4. Any Bachelor's degree in chemistry will require a Physics Sequence. Many universities require University Physics (which will require Calculus III) while some require College Physics. It is highly recommended that the student use the elective credits to satisfy some of these requirements.

Recommended academic map assumes:

1. Readiness for college-level English
2. Readiness for Calculus I
3. Readiness for General Chemistry
4. No previous credit earned

Note: Organic Chemistry sequence may be replaced by

Student MUST know the course requirements for the university they plan to attend.

Any advanced degree in chemistry will require a physics sequence and more math courses.

For example, (1) College Physics I & II with labs (PHY 2053, PHY 2054, PHY 2053L and PHY 2054L may substitute for University Physics for some programs (2) Differential Equations (MAP 2302) is required by many universities
