* The values marked with an asterisk are calculated dynamically for each individual student based upon their actual enrollment. The figures shown above are based on a hypothetical student enrolled in 12.0 credit hours for fall and 12.0 credit hours for spring.

** The values marked with a double asterisk are calculated dynamically only for individual students who are awarded federal loans. The figures shown above are based on a hypothetical freshman student awarded \$9,500 of federal loans.

¹ Lab and e-learning fees are not assumed in these figures but are incorporated into each individual student's cost of attendance.

Please note:

- Students enrolled less than half-time (< 6.0 credit hours) may be awarded financial aid based on a less-than-half-time cost of attendance which includes only tuition, books, and transportation. Enrolling less than half-time may result in a student not being eligible for Pell grant disbursement when they would otherwise be eligible for Pell grant disbursement with greater than half-time enrollment.
- [Adjustments to budgets may be considered on a case-by-case basis with appropriate documentation via Professional Judgment.](#)
- Students may have their federal loan award amounts corrected due to the dynamic nature of the cost of attendance components with asterisks above. Students with such 'Cost of Attendance loan adjustments' will be notified if their overall federal loan award amount decreases.
- Transportation includes approximate vehicle insurance, maintenance, and fuel costs.
- Miscellaneous expenses may include clothing, medical, incidental, and technology costs.
